Kerja Sama Perusahaan

The Caprari group is a leading manufacturer on an international level in the production of centrifugal pumps and electric pumps and in the creation of advanced solutions for management of the integrated water cycle.

Founded in 1965 by Amadeo Caprari, the company has continually expanded and diversified its business, to respond with innovative products and services to the specificity and changing needs of the world of water with a view to an increasingly closer and more specialized partnership with its customers. Thanks to its exclusive and diversified know-how, the finest and most efficient solutions for the main water requirements are now supplied: deep well pumping, waste and drainage water lifting, residential, industrial and agricultural water supply and distribution, and water treatment in general.

COGEM is a limited liability company founded in 1965 and having the head office in Casaleto d'Angelo (Bologna), Via dei Fabbri 11° 7.

At first COGEM was born thanks to a team of technicians with the intent to produce motorpump sets for Emilia Romagna farms.

The fast development of the industrial context, the capacity and the devotion of the employees and of the management to the work allow COGEM to expand itself in a very short time. In consequence the local market comes national market and permits COGEM to enlarge the range of products. That's how increase the demand of generators and fire fighting sets.

Soon after, the intent to improve one's own products induce Cogem General Management to look for international customers. Furthermore, the participation to national and foreign trade exhibitions gives to COGEM the possibility to get business relationship with North Africa, North Europe and South America.

For all reasons above mentioned, today COGEM is one of the most quoted competitors all over the world.

Scova Engineering is a leading company specialized in manufacturing irrigation motorpumps, it offers a wide range of products such to fully satisfy any requirements. We also produce motor clutches, motorpumps for every application, electric pumps, life manufacture hydraulic heads and bends, electric generators PTO driven or not provided.

Scova Engineering S.p.A. was born in 1968, from the withdrawal of Scova S.p.A., active on the market since 1965.

Our long experience in the sector of motor pumps and generating sets gives us a special advantage in the design, construction and marketing of modern and efficient systems. We are in a position to offer plants of any power range and complexity to meet the most varied requirements.

OCMIS (IRRIGAZIONE) SPA is the world leader in the production of hose reel irrigators, spray booms and pumps.

First-class performance, advanced technology, a wide choice of products suitable for every possible need and reliability ensured by the high quality of our machines are the result of a highly motivated and committed company. This motivation and commitment has led OCMIS to the top of both domestic and international markets.

Thirty years of experience and of research and innovation serving the needs of the agricultural industry have given OCMIS a sustained period of continual expansion, projected from the hills of Casalevetro (Livorno) towards global markets.
